

## RIG VEDA 6

### Introductory remarks.

In Rig Veda 6 the Triṣṭubh is the most common meter, followed by the Gāyatrī and the Anuṣṭubh. There are only 38 Jagatī stanzas; the Bṛhatī / Satobṛhatī group is almost as frequent. A variety of other meters is attested: Atijagatī, Atinicitṛ, Kakubh, Dvipadā, Pañkti, Pādanicitṛ, Puraūṣṇih, Mahābṛhatī, Mahāsatobṛhatī, Virāj.

A number of 11- and 12-syllable lines (a total of 30) in this book have a caesura after the third syllable. Ten-syllable lines are also rather common. The majority of the hymns exhibit some metrical irregularities. On the other hand, hymns 1, 7-9, 41-43, 58, and 74 are composed in regular Trimeter meters. There are also three regular Gāyatrī hymns (55-57).

### Metrical Notes.

6.1.2d Tr. Exceptionally, -o in citáyanto should be scanned as long before a following vowel to normalize the uncommon cadence UU-Ū. 1.3b Tr.
